PAULINA ACUÑA PAIVA

Programming and Systems Analysis Technician

Santiago, Chile | paulina.acuna.paiva@gmail.com | +56 9 7447 6368 | linkedin.com/in/paulinefugit | github.com/Pauaua | paulinaap.vercel.app

PROFESSIONAL SUMMARY

Programming and Systems Analysis Technician with a solid foundation in programming logic, databases, and data processing, and software development in multiple languages (Java, Python, JavaScript/TypeScript, PHP). Experience building complete solutions from start to finish: advanced SQL and data modeling, ETL, data validation and quality, reporting and visualization (Power BI), process automation, backend architectures, and web and mobile applications. Over ten projects delivered in less than two years of formal training, with a focus on clean code, reliable data, and continuous learning.

TECHNICAL EXPERIENCE

Asesorías Valdivia — Software Developer (Project-based) *May 2026 – Oct 2026*

Santiago, Chile

- Built TuContaPro end to end: a multi-company accounting SaaS platform for Chilean accounting firms and SMEs (React, NestJS, Prisma, PostgreSQL, Docker), in production at tucontapro.cl (Railway and Vercel).
- Implemented F29 tax filing, fee invoicing (honorarios), bank reconciliation, fixed assets, financial statements, and a tax calendar, validated against a 24-case accounting checklist.
- Designed the platform for Chile's Law 21.719: per-client isolation with Row-Level Security, encryption and traceability of tax credentials, encrypted backups, and certified data deletion.

Mimasoft — Full Stack Developer (Internship, 360 hrs) *Feb 2026 – Apr 2026*

Chile

- Developed the bilingual (ES/EN) institutional website in WordPress on a Divi child theme, with a dynamic JavaScript translation system and a multi-tenant architecture based on DDD.
- Integrated WPForms with reCAPTCHA v2 and glassmorphism styling; resolved Polylang redirect bugs and JavaScript scope errors.
- Produced a digital audit of the institutional site with competitive benchmarking and a four-phase implementation roadmap.

Asesorías Valdivia — Full Stack Developer *May 2024 – Dec 2024*

Santiago, Chile

- Built sites and platforms for external clients with Next.js 15 under agile methodologies.
- Managed data persistence with Prisma ORM across MySQL, PostgreSQL and Supabase, with continuous deployment on Vercel.
- Worked directly with clients to gather and define requirements.

FEATURED PROJECTS

TuContaPro — *React, NestJS, Prisma, PostgreSQL, Docker*

Multi-company accounting SaaS in production (tucontapro.cl) for Chilean accounting firms and SMEs: F29 tax filing, fee invoicing, bank reconciliation, fixed assets, financial statements, and a tax calendar, validated with 24 accounting cases. Privacy by design for Chile's Law 21.719 (Row-Level Security, encryption, and encrypted backups with certified deletion).
github.com/Pauaua/TuContaPro

NotMubi — Spring Boot, Spring Cloud, Eureka, JWT, PostgreSQL, Docker, React

Full-stack streaming platform for cult cinema, built as a **microservices architecture** with 5 independent services (Gateway, Discovery, Auth, Catalog, Subscription). JWT authentication centralized at the Gateway with stateless validation between services; inter-service communication via **OpenFeign + Eureka** (no hardcoded URLs); each service with its own bounded context and independent PostgreSQL database. Reproducible infrastructure with Docker Compose (Postgres + PgAdmin), a multi-module Maven backend with a parent POM, and a React + Vite frontend. Includes thematic subscription plan management and a catalog with cult-status tiers.
github.com/Pauaua/NotMubi

EclipseFM — *Next.js 14, TypeScript, Prisma, PostgreSQL, NextAuth v5*

Full-stack platform for an online radio station: live audio player, chat, program schedule, and an admin panel with 3 roles (Admin, SubAdmin, Team).
github.com/Pauaua/EclipseFM

StayCool — *Expo, React Native, TypeScript, Supabase, RevenueCat*

Personal agenda app for tracking wellness, appearance, and hygiene routines, with a gamified rewards system, PDF report generation, and push notifications. Backend on Supabase (PostgreSQL with Row-Level Security, authentication, and Edge Functions), subscriptions via RevenueCat, monitoring with PostHog and Sentry, and testing with Jest. Native builds managed with EAS. In development, not yet published on app stores.
github.com/PauFugit/StayCool

Asegalbyf Asesorías — *Next.js, Prisma ORM, Tailwind CSS, Transbank*
E-commerce site for an insurance brokerage: manageable admin dashboard for service management, checkout with Transbank payment integration. Built solo in 3 weeks. Live site: asegalbyfasesorias.cl
github.com/PauFugit/FS-ASEGAL

SII Automation Suite — *Python, PyQt5, Selenium, Pandas*
Second implementation of a tax-automation project for Asesorías Valdivia (Dec 2025): built the desktop program and then integrated it to run directly from their website. Two tools for the Chilean tax authority (SII) portal (electronic invoices and fee receipts) with individual and bulk processing from Excel, up to 3 concurrent threads, headless mode, and a professional installer (PyInstaller + Inno Setup) for the desktop version.

PhantasiaWeb — *Next.js 16, TypeScript, Tailwind CSS v4, Prisma, PostgreSQL*
Corporate website for a design and software studio: trilingual internationalization (ES/EN/FR) with locale-based routing, dark/light mode with system-preference detection, and a 6-step onboarding form that persists leads to a database and sends automated email notifications.

EDUCATION

Instituto Profesional San Sebastián (ex CIISA) *Feb 2024 – Present*
Santiago, Chile
- Computer Engineering — in progress. Focus on software architecture, databases, and design patterns (MVC).
- Technical Analyst Programmer — degree obtained (Feb 2024 – Apr 2026); intermediate exit with a 360-hour internship.

4Geeks Academy *Jul 2022 – Nov 2022*
- FullStack Software Development.

Universidad Miguel de Cervantes *2019 – 2021*
- M.A. in Education.

Pontificia Universidad Católica de Valparaíso *2010 – 2016*
- B.A. in Education — Philosophy Pedagogy.

TECHNICAL SKILLS

- **Languages & Frameworks:** Java, Python, JavaScript (ES6+), TypeScript, HTML5/CSS3, Spring Boot, React, Next.js, Node.js, React Native, Expo, Ionic/Angular, Flask, PHP, Laravel, Tailwind CSS, NativeWind, Framer Motion
- **Architecture & Patterns**: Microservices (Spring Cloud, Eureka, API Gateway, OpenFeign), JWT, REST, Service Discovery, CORS, DDD, MVC
- **Databases & ORM:** MySQL, PostgreSQL, SQL Server, Oracle SQL, Prisma, SQLAlchemy, JPA.
- **Data & Analytics:** Advanced SQL (JOINs, CTEs, window functions), data modeling, stored procedures and views; Pandas, ETL, data quality and validation; Power BI and code-based charts; descriptive statistics; report automation; cloud data (Supabase, AWS); data privacy and governance (Law 21.719).
- **State & Data:** TanStack Query, Zod
- **Cloud & Deploy**: Vercel, Railway, Supabase, AWS, Cloudflare, Docker, EAS Build
- **Testing & Monitoring**: Jest, PostHog, Sentry
- **Tools**: Git, VS Code, Figma, Maven, Postman, WordPress
- **Methodologies**: Scrum, Agile Development, Project Management

TEACHING & MANAGEMENT EXPERIENCE

Philosophy Teacher — Formal education system (municipal and private subsidized) *May 2017 – Dec 2025*
Santiago, Chile
- Eight years of formal teaching; developed curriculum planning, effective communication with diverse audiences, and classroom management. Daily end-user experience with digital education platforms: Moodle (LMS), virtual class record system, and other school management platforms.

Project Director — A.L.T. (Social, Cultural and Environmental Organization) *Nov 2020 – Dec 2025*
Santiago, Chile
- Led agile project management: scope and requirements definition, coordination of multidisciplinary teams, and problem-solving in dynamic contexts.
